Product Description

PDC Cutters for Bearing fixed cutter drill bits pdc cutter manufacturers diamond pdc bit

The ultra-high hardness and strength of PCD allows PDC Bearings` thrust bearings to sustain very high loads during operation. In addition, wearing at a very low rate, results in the PCD bearings lasting from 1000 hours to many years, depending on the application. PCD thrust bearings are ideally suited for process-fluid-lubricated applications, particularly those where abrasive particles are present in the fluid.

PDC cutters for bearing are made by special interface design, can well optimized and promote the cutters` performance, increase the bearing`s working life, help customers to save the cost and improve the efficiency.
