

Building Industry PCD Cutting Tool Blanks Polycrystalline Diamond Pcd For Building Industry

Basic Information

Place of Origin: China
Model Number: Round Disc
Minimum Order Quantity: 1 PCS

Packaging Details: Plastic box, CartonDelivery Time: 5-8 workdays

Payment Terms: T/T, Western Union, L/C
 Supply Ability: 1500 pieces per month

Product Specification

PCD Cutting Tool Blanks: PCD BlanksShape: RoundSize: 58mm

Grain Size: 5μm, 10μm, 25μm

Application: CuttingTransport: By Air

• Highlight: Building industry PCD Cutting Tool Blanks,

 $\ \ \, \text{bronze PCD Cutting Tool Blanks}\,,$

Building industry polycrystalline diamond pcd

Product Description

PCD Blanks for Building materials industry, PCD Discs, PCD Cutting Tool Blanks

1. Description:

We have equipped with many production facilities and inspection instruments for PCD cutting tool blanks, such as SEM, ultrasonic scanning technology (C-SCAN), etc. We also have capabilities of large-diameter PCD disc sintering, proven PCD surface processing, polishing and cutting technologies.

We focuse on developing new PCD cutting tool blank grades which are suited to cutting and machining the variety of new and emerging materials in industry, and for tools targeted to meet our customers' needs.

2. Specification:

Grain Size	Туре	Property	Application
Fine 5 µm			Used for copper, bronze, aluminum, plastic, wood composites;
Medium 10 µm	Round disc	good balance of	Used for low-medium silicon aluminum alloys, copper alloys, wood composites, etc.
Coarse 25 µm	Round disc Cutting tips	Good wear resistance	Used for high silicon aluminum alloys, metal matrix composites, laminate flooring, carbide alloy, ceramics, etc.

1). Special overall thickness, such

as 0.8mm. 1.0mm, 1.2mm, 2.5mm, etc. are available for customization.

- 2). Special PCD thicknesses are also available for customization.
- 3). Both regular and irregular PCD cut tips in various shapes or profiles are available in accordance with customers drawings.

3. Application:

PCD products in medium coarse grain sizes are also widely used for processing different materials in building & constructing industry, such as graphite, stone, carbon fiber composite materials, etc., which require higher wear resistance tools.
