## Product Description

### PDC Cutters for Bearing Geological exploration Water Well Drilling Mining PDC Cutter

PDC cutters combine the physical advantages of both diamond and tungsten carbide - high toughness, high abrasion resistance and high impact resistance.

Wearing at a very low rate, results in the PCD bearings lasting from 1000 hours to many years, depending on the application. PCD thrust bearings are ideally suited for process-fluid-lubricated applications, particularly those where abrasive particles are present in the fluid.
