#### 3. Application:

Wire drawing dies are commonly used to reduce the diameter of various ferrous and non-ferrous rods and wires. Applications include various grades of low, medium and high carbon steels, steel alloys, stainless steel, welding wire as well as various non-ferrous rods and wires.

#### 4. Advantages:

Tungsten carbide dies are an excellent option for manufacturing ferrous rod-size wires. They are also ideal for short trial runs. Our TC drawing dies are manufactured with a mirror polish and a smooth wire entry to ensure optimal die life and string-up. We offers a complete line of TC drawing dies for rod-size wire down to medium-size wire.
