## Product Description

### Vitrified bond grinding wheel

Vitrified bond grinding wheel has high strength, good heat resistance, sharp cutting, high grinding efficiency, not easy to heat and clogging in the grinding process, small thermal expansion, in order to control the machining accuracy.

Features of vitrified bond grinding wheel: Easy dressing, long dressing interval, suitable for large feed processing, suitable for all kinds of casting steel materials processing. High processing efficiency, stable processing size, high product precision, can effectively control burns, cracks, and other grinding problems.

Vitrified bond grinding wheel has more and more obvious advantages in the grinding of diamond, industrial ceramics, pcd cutters, polycrystalline diamond, pcd cutting tools, cubic boron nitride, tungsten carbide and other high hard and brittle materials.

We supply diamond & CBN grinding wheels. No matter grinding, sanding, cutting or finishing, you will always find a proper product here. We always provides customers the most competitive price, consistent quality, efficient service and the most effective tech support.
