3. Application:

Wire drawing dies are commonly used to reduce the diameter of various ferrous and non-ferrous rods and tubes. Applications include automotive, medical wire, superconducting, and welding wires.

4. Advantage:

Our tubing dies give the manufacturer the ability to maintain a uniform tube roundness, wall thickness and minimize material usage.

Our tubing dies are customized to match your requirements. We can help you with engineering the correct drawing die size and geometry that will create the tube with the correct diameter and correct wall-thickness.
