Our Product Introduction

Solid CBN, Overall CBN, PCBN Blanks For Cutting Tools

1. Description:

CBN, with characteristic of high hardness, high wear resistance and high thermal stability, is made of selected CBN powder and sintered at high pressure and high temperature, with metals or ceramic binders.

2. Specification:

CBN Content	Туре	Property	Application
	Solid PCBN Carbide backed PCBN	anti-chipping, better impact	Gray cast iron, powder metallurgy metals
1 7/10/	Solid PCBN Carbide backed PCBN	limnact resistance better	Hardened steel,Mould steel,
1 5/1%	Solid PCBN Carbide backed PCBN	Excellent chemical stability and good thermal stability	Chilled steel

3. Application:

CBN is ideal for tools in machining of high hardness and hard processed ferrous materials (HRC45-65), such as hardened steel, gray cast iron, heat resistant alloy, high-speed steel, hard facing alloys, Ni-Cr alloy, powder metallurgy metals. CBN is typically used to machine brake discs, engine blocks, engine cylinder liners, brake drums, flywheels, valve seats and guides, gears, mold and die parts, etc.

4. Advantage:

Multiple grades of CBN blanks and wide range of application High cost-effective, Easy Processing, Good performance, High wear resistance, Consistence Strong technical support, Customized R&D CBN and service
