Product Description

PDC Cutters for Floor Grinding Mining PDC Cutter Wear Parts

The invention of the PDC cutter propelled the fixed cutter to the forefront of the drilling industry and the idea instantly took off. Because the shearing action of PDC cutters are more efficient than the crushing action of a button or tooth bit, fixed cutters are in high demand.

In 1982, PDC drill bits accounted for only 2% of total footage drilled. In 2010, 65% of total footage drilled was by PDCs.

PCD cutters for floor grinding are sintered with selected diamond powder and tungsten carbide under high temperature and ultra-high pressure. The PCD cutters has high hardness and wear resistance, be widely used for floor grinding, such as removing glues,epoxy, paint, and urethanes.
